User Manual for AstraG

Welcome to Astrag!

Thank you for choosing AstraG, an advanced AI-driven platform designed to assist you with a variety of tasks, powered by Gemini's Generative API. Whether you're looking to chat with our AI, receive personalized recommendations, or simply explore the app's unique features, this manual will guide you every step of the way.

1. Getting Started

Navigating the Interface
- Home Screen :
  In the home screen, where you'll find:
    - Navigation Bar : At the top, you'll find links to Home , Chat with AI and Recommendations .
    - Main Area : Here, the content will change depending on the section you're in.

2. Main Features

Chat with AI

Your main interaction with the app revolves around chatting with the AI assistant, which is powered by the Gemini Generative API.

- Starting a Conversation:
  To begin chatting with the AI, click on the "Chat with AI" button in the navigation bar. You'll be directed to the AI chat screen, where you can type any question or command, and the AI will respond intelligently.

- Interacting with the AI:

    - Type your query or request in the chat input box at the bottom of the screen.
    - Press Enter or click the Send button to submit.
    - The AI will analyze your query and provide a response, which you can continue to interact with.

- Suggested Prompts:
  If you're unsure what to ask, click the "Suggestions" button to view some sample prompts, such as:
    - "What's the weather like today?"
    - "Give me a movie recommendation."
    - "Help me with a coding issue."

3. Downloading the User Manual

If you ever need a quick reference guide, you can download this user manual directly from the app.

- Download the Manual:
  Simply click the "Help" button in the bottom corner of the screen to download the PDF version of this user manual. It will be saved to your device for offline use.

5. FAQs

Q: How do I interact with the AI?

A: Simply type your question or request in the chat box and press Enter. The AI will generate a response.

Q: How accurate are the AI's recommendations?

A: The AI's recommendations improve over time based on your interactions and preferences. The more you use the app, the better it gets at personalizing suggestions.

Q: Can I change the AI's tone or style of conversation?

A: Yes! You can adjust the AI's tone in the Settings section of the app. Choose between formal or casual conversation styles.
